Bio

Nicolas Sassoon makes use of early computer imaging techniques to render visions of architectures, landscapes and natural forces. Sassoon's practice translates ideas of materiality and immateriality into digital animations, installations, prints, and sculptures. His work explores the contemplative and projective dimensions of screen-based space, and how the digital image can express dimensions of the physical realm. While most of his output is published online, Sassoon also materializes his web-based practice into a wide range of Medias. His visual research often leads him to engage in cross-disciplinary projects in the fields of architecture, electronic music, textiles, and art. Nicolas is a founder of the collective W-A-L-L-P-A-P-E-R-S. His work has been exhibited at The Whitney Museum of American Art (US) Eyebeam (US), 319 Scholes (US), Vancouver Art Gallery (CA), Plugin ICA (CA), Contemporary Art Gallery (CA), Charles H.Scott Gallery (CA), Western Front (CA), PRETEEN Gallery (MX), Victoria & Albert Museum (UK), the Centre d'Art Bastille (FR), Arti et Amicitiae (NL), MU Eindhoven (NL), Today Art Museum (CN), the Berlin Fashion Week (DE) and the New-York Fashion Week (US).
